

Land

2 458 m² Turnov, Nádražní

474 500 €

A unique and strategically located plot with high development potential.

The land is positioned on a commercial avenue, just steps from a train station, with full access to technical infrastructure and excellent public transport links. Its orientation also offers favourable exposure to the cardinal points.

This is an opportunity to contribute to enhancing the city's quality of life by developing residential housing, as outlined in the proposed study, and creating a landmark entrance to the city
